

ABHIKRISHNA A

AI Full-Stack Developer(Python)

Kozhikode, India | abhikrishna616@gmail.com | +91-9037390873
[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

AI Full-Stack Developer building end-to-end features from responsive React.js frontends to optimized Django and FastAPI backends on PostgreSQL and MySQL. Experienced in REST API design with Django REST Framework (DRF), ORM-based database modeling, Docker containerization, and LLM-powered features such as Retrieval-Augmented Generation (RAG).

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript (ES6+), TypeScript
- **Backend:** FastAPI, Django, Django REST Framework (DRF), SQLAlchemy 2.0 (async), Alembic, Pydantic v2, Redis, Celery, JSON Web Token (JWT) authentication, Argon2id, pyotp (TOTP), REST APIs, Model-View-Template (MVT), WebSockets
- **Frontend:** React 19, Next.js 15, Redux Toolkit, React Router, HTML5, CSS3, Tailwind CSS, shadcn/ui, Radix UI, react-hook-form, Zod, Recharts, responsive design
- **Database:** PostgreSQL (Row-Level Security, pgvector, triggers), MySQL, SQLite, database design, query optimization, database migrations
- **AI & ML:** Large Language Model (LLM) integration, Retrieval-Augmented Generation (RAG) and semantic search, LangGraph, scikit-learn, SHAP, provider-agnostic LLM routing (OpenRouter, Groq, OpenAI, Ollama)
- **Cloud & DevOps:** Docker, Docker Compose, Nginx, GitHub Actions (CI/CD), Kubernetes, Terraform, uv, pnpm/Turborepo, Git/GitHub, microservices

PROJECTS

Skyrict – AI-Native ERP Platform

[GitHub](#)

FastAPI, SQLAlchemy 2.0, PostgreSQL, Redis, Next.js, React 19, Docker, LangGraph, LLMs

- Built an AI-native ERP platform on FastAPI with a layered router-service-repository architecture, PostgreSQL Row-Level Security (RLS) for per-tenant isolation, and role-based access control (RBAC).
- Designed the data layer: append-only ledgers, database triggers, and row-level locking for data integrity under concurrent access.
- Developed a payroll automation engine: cron scheduling, idempotent batch workers, pre-flight validation, dry-runs, and notification orchestration.
- Added AI on real ERP data: attrition-risk models (scikit-learn + SHAP), anomaly detection, compliance alerts, and RAG-based search.

GhostCode – AI-Powered Dead Code Detector

[Live Demo](#)

Python, Django, React, FastAPI, PostgreSQL, Celery, Docker

- Built an AI app detecting unused imports, dead functions, and unreachable branches across 60+ file types.
- Combined static cross-referencing with an LLM fallback (Groq/Gemini) for intra-file dead code.
- Added real-time WebSocket progress, TOTP multi-factor authentication, RAG-based semantic chat, and Docker Compose deployment.

Sprint.X Store – E-Commerce Web Application

React.js, Redux Toolkit, Tailwind CSS, React Router

- Built a responsive e-commerce store with separate user and admin interfaces.
- Implemented product listing, filtering, a cart system, checkout, and an admin panel.
- Managed global state with Redux Toolkit and dynamic routing with React Router.

EXPERIENCE

Full Stack Developer

Sep 2025 – Present

Bridgeon Solutions | Kozhikode, India

- Built full-stack web applications with Python, Django, and React.js, delivering responsive user interfaces.
- Designed and managed SQL databases and wrote efficient queries through the Django ORM.
- Constructed and integrated RESTful APIs connecting frontend and backend services.

EDUCATION

Bachelor of Technology (Electronics and Communication Engineering)

2025

Federal Institute of Science and Technology, Ernakulam
